ASSIST Project has started!

Launch of
ASSIST

BACKGROUND

The ASSIST project addresses the need for incarcerated learners of Second Chance School of Domokos to acquire practical skills and digital competences in order to strengthen their personal expertise in digital transformation and obtain concrete programming skills. Particularly, this project facilitates the access and use of digital tools from a social group with limited access to them. This is achieved with the implementation of digital courses by the two participating University departments.

OBJECTIVES

Increase access to digital tools and technologies for incarcerated people

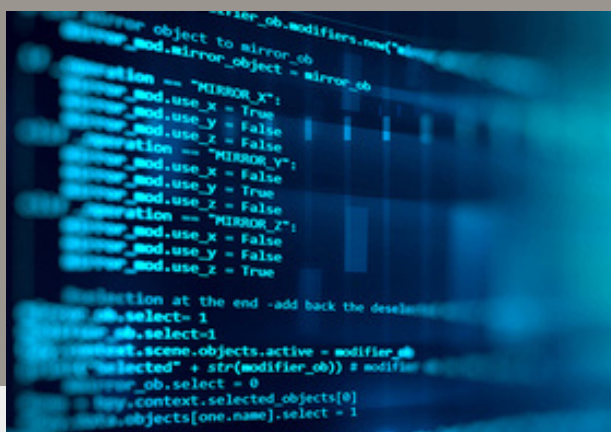

Strengthen prisoners' ability to understand basic computing and programming skills

Promote and sustain digital readiness inside a prison school with limited web access

Reduce barriers posed to prisoners regarding digital knowledge and skills .

Build sustainable digital material (multimedia lessons) that could be used by other incarcerated people in other prison facilities.

Implement a digital toolkit with distinct lessons directly addressed to imprisoned people .
